Mohamed Ashraf Eldemerdash

Computer Science Student | Software Engineering, Cybersecurity & Networking

LinkedIn • GitHub

mo.eldemerdash.personal@gmail.com
+201029345552
1st Settlement, Cairo, Egypt

First-year Computer Science student with hands-on experience across software development, web applications, and interactive technologies (game development, VR/AR). Strong interest in cybersecurity and networking, with practical exposure to secure system design, testing, and troubleshooting. Experienced in collaborative environments through internships, hackathons, and volunteering, delivering interactive solutions and supporting real-world initiatives. Highly motivated to grow in cybersecurity, networking, and software engineering while contributing to secure, scalable, and innovative projects.

Education

HighSchool Technical Diploma at El Sewedy Technical Academy - STA, 10th of Ramadan City

September 2022 - July 2025

Grade: 99%

Pearson BTEC International Level 3 Extended Diploma at El Sewedy Technical Academy - STA, 10th of Ramadan City

September 2022 - July 2025

Grade: DISTINCTION* DISTINCTION DISTINCTION

Professional Bachelor in Technology at New Cairo Technological University - NCTU, Al Lotus, First New Cairo, New Cairo 1

September 2025 - Present

Internships

Unity Game Developer at EDIX

September 2023 - May 2025 • ↗

- Developed and deployed cross-platform games using Unity for desktop and mobile, adapting gameplay, UI, and controls for different devices.
- Designed and implemented gameplay mechanics in C#, including player movement and interaction.
- Integrated UI systems responsive to multiple screen sizes and platforms, improving usability across desktop and mobile devices.
- Collaborated with team members using Git/GitHub, contributing clean, well-documented code to shared repositories.

Unity Game Developer at Parallel XR, 137 2nd Dist, 5th Settlement, Cairo

October 2025 - January 2026 • ↗

- Built VR experiences in Unity, implementing immersive interactions, camera systems, and input handling to enhance user engagement.
- Created AR applications using Unity AR tools, integrating real-world tracking and interactive virtual elements.
- Optimized performance for mobile and VR platforms by reducing draw calls, managing assets efficiently, and improving frame stability.
- Debugged and resolved platform-specific issues using Unity debugging tools and profilers.
- Participated in iterative development and testing cycles to refine gameplay and user experience across platforms.

Skills

Programming & Scripting: Java, Python, C# (Unity), Batch Script, PowerShell, C++ (IoT projects), HTML, CSS, JavaScript, jQuery, BootStrap, PHP.

Game Development: Unity (2D & 3D), VR & AR Development, Cross-Platform (Desktop & Mobile), Gameplay Mechanics, UI Integration, Performance Optimization.

Database & Analytics: Oracle APEX (Database Development), SQL, Power BI, Excel (Data Analysis & Reporting).

Software Testing & QA: Selenium, Postman, Agile / Scrum, Jira, Debugging & Testing.

Networking, Security & Cloud: Enterprise Networking (CCNA+), Subnetting & Routing (VLSM, OSPF), Network Security (VLANs, ACLs), Packet Analysis & Threat Detection (Wireshark), Network Emulation & Troubleshooting (Cisco Packet Tracer), Linux Security & Pentesting (Kali Linux), Windows Server & Active Directory Security, Cloud & Remote Access Security (Oracle Cloud, RDP, VPNs).

Tools & Technologies: Git & GitHub, Docker, n8n, Wireshark, Nmap, Metasploit, Burp Suite, Cisco Packet Tracer, Kali Linux Toolset, Active Directory Tools, PowerShell & Bash, Oracle Cloud Console, Firewall & VPN Configuration.

Volunteering

Admission Helper – STA Newcomers at El Sewedy Technical Academy - STA, 10th of Ramadan City

June 2024 - July 2024

- Assisted in the registration and orientation of 50+ new students and families, ensuring a smooth onboarding experience.
- Coordinated with staff to streamline the admission process, reducing wait times and improving efficiency.
- Provided guidance and support to newcomers, enhancing their integration and overall experience at the institution.

Ramadan Box Preparation Helper at Egyptian Food Bank, 44 Gamal Abd Al Naser Axis, New Cairo 3, Cairo Governorate 4713311

August 2024 - August 2024

- Helped prepare and organize 200+ Ramadan food boxes for families in need, contributing to community welfare.
- Collaborated with a volunteer team to ensure timely and accurate distribution of resources.
- Supported logistics and packaging processes, improving workflow and efficiency during high-demand periods.

Projects

Student Attendance System – Oracle APEX (Pearson)
Developed a database-driven attendance tracking system for students using Oracle APEX, enhancing record management and reporting.

ATM System Clone For Crédit Agricole Bank – Java (Pearson)
Built a functional ATM system clone in Java, implementing account management, withdrawals, deposits, and transaction history.

Data Forecasting & Prediction Application – Excel (Pearson)
Created a data forecasting tool in Excel, using advanced formulas and charts to analyze trends and predict outcomes.

EDIX Website Clone – HTML, Bootstrap, CSS, jQuery, PHP, XAMPP (EDIX)
Built a dynamic web application with front-end and back-end integration, demonstrating full-stack web development skills.

Bank Du Caire Mobile Application Clone – Java (Pearson)
Designed a mobile banking application clone in Java, including user authentication, account overview, and basic transactions.

Testing on Elsewedy Electric Website – Manual & Automation Testing (Pearson)
Conducted functional and automation testing using Selenium, Postman, Agile, and Jira, identifying and reporting bugs to improve site quality.

Windows Server Environment Setup – Oracle RDP (Pearson)
Configured Windows Server environment with user accounts, groups, and privileges via Oracle RDP, gaining hands-on cloud & server management experience.

IoT Power Management System – ESP8266 (Pearson)
Developed an IoT system to monitor and control power, integrating sensors, indicators, and microcontroller logic for real-time management.

EcoRun – Unity & C# (EDIX)
Developed an endless runner game set in a post-apocalyptic world affected by CO_2 emissions. Players navigate a forest to collect clean air while avoiding obstacles, implementing smooth player movement and collision mechanics.

Island Escape – Unity & C# (Parallel XR)
Created a desktop game where players collect resources to build bridges and escape an island. Implemented interactive environment mechanics and dynamic obstacle challenges.

Renault AR Experience – Unity & C# (Parallel XR)
Built an AR application allowing users to scan a QR code to view a car model, interact with doors, seats, lights, and change colors, demonstrating augmented reality integration and interactive 3D modeling.

Garden Care VR – Unity & C# (Parallel XR)
Developed a VR simulation where players maintain a greenhouse by removing harmful plants from lemon trees. Implemented immersive VR interactions and hand-tracking mechanics.

Elsewedy QA Game – Unity & C# (Parallel XR)
Designed a VR/desktop QA game simulating quality inspection of motors on a conveyor belt. Players identify and remove damaged products, showcasing interactive mechanics and real-world process simulation.

Certificates

Professional Communication & Leadership Training from Microsoft
November 2023
Developed teamwork, problem-solving, and professional communication skills.

CCNA & CCNA+ from Cisco Networking Academy
November 2023
Hands-on training in enterprise networking, routing & switching, subnetting, and network troubleshooting.

Professional Communication & Leadership Training from Coca-Cola Egypt
February 2024
Strengthened leadership, collaboration, and workplace efficiency skills.

Java Programming from Oracle
May 2024
Experience with object-oriented programming, core Java concepts, and practical coding.

Google IT Support Fundamentals from Google
June 2024
Foundation in IT systems, networking, operating systems, and security best practices.

Digitopia Hackathon from NTRA & Ministry of Communications & IT
September 2025
Advanced to Round 2 in a national hackathon focused on digital innovation.

Networking & Cybersecurity Fundamentals from Huawei Academy

November 2025

Training in network security principles, protocols, and cyber threat mitigation.

Advanced English Proficiency from IARS (Cambridge-aligned)

December 2025

Professional-level English communication for technical and workplace environments.
