PROFILE

Computer Science student with hands-on industry experience across software engineering, game development, quality assurance, networking, cybersecurity, and cloud technologies through multiple internships, technical projects, and hackathons. Experienced in developing desktop, mobile, VR, and AR applications, implementing secure and scalable solutions, and collaborating in Agile development environments. Continuously expanding technical expertise through real-world projects, certifications, and a strong passion for solving complex engineering challenges.

EDUCATION

HighSchool Technical Diploma at El Sewedy Technical Academy - STA, 10th of Ramadan City, Egypt — **September 2022 - July 2025**

Grade: 99%

Pearson BTEC International Level 3 Extended Diploma at El Sewedy Technical Academy - STA, 10th of Ramadan City, Egypt — **September 2022 - July 2025**

Grade: DISTINCTION* DISTINCTION DISTINCTION

Bachelor of Science in Information Security at ITMO University, ITMO University, Saint Petersburg, Russia — **October 2026 - Present**

INTERNSHIPS

Unity Game Developer at EDIX — **September 2023 - May 2025**

- Developed and deployed cross-platform games using Unity for desktop and mobile, adapting gameplay, UI, and controls for different devices.
- Designed and implemented gameplay mechanics in C#, including player movement and interaction.
- Integrated UI systems responsive to multiple screen sizes and platforms, improving usability across desktop and mobile devices.
- Collaborated with team members using Git/GitHub, contributing clean, well-documented code to shared repositories.

Unity Game Developer at Parallel XR, 5th Settlement, Egypt — **October 2025 - January 2026**

- Built VR experiences in Unity, implementing immersive interactions, camera systems, and input handling to enhance user engagement.
- Created AR applications using Unity AR tools, integrating real-world tracking and interactive virtual elements.
- Optimized performance for mobile and VR platforms by reducing draw calls, managing assets efficiently, and improving frame stability.
- Debugged and resolved platform-specific issues using Unity debugging tools and profilers.
- Participated in iterative development and testing cycles to refine gameplay and user experience across platforms.

TECHNICAL COMPETENCIES

Programming Languages: Java, Python, C, C++, C#, SQL, JavaScript, PHP, HTML5, CSS3, PowerShell, Bash, Batch Scripting.

Software & Web Development: Object-Oriented Programming (OOP), Front-End Development, Back-End Development, React, Laravel, RESTful API Development & Integration, Software Architecture, Version Control (Git & GitHub), Agile/Scrum, CI/CD, Software Debugging.

Networking & Infrastructure: Enterprise Network Administration, Network Design & Configuration, TCP/IP Networking, Routing & Switching, IPv4/IPv6 Addressing & Subnetting, DNS & DHCP Services, Windows & Linux Server Administration, Active Directory, Virtualization, Remote Server Management, Network Monitoring, Documentation & Troubleshooting.

Cybersecurity: Network Security, System Hardening, Identity & Access Management (IAM), Vulnerability Assessment, Security Testing, Firewall & VPN Configuration, Security Monitoring & Traffic Analysis, Secure System Administration.

Infrastructure & Self-Hosting: Home Lab Design & Administration, Self-Hosted Infrastructure, Reverse Proxy & Load Balancing, DNS Filtering & Local DNS Services, Network Attached Storage (NAS) Administration, Backup & Disaster Recovery, Containerized Service Deployment, Authentication & Access Management, SSL/TLS Certificate Management, Service Monitoring & Health Checks.

Cloud, DevOps & Infrastructure: Cloud Infrastructure, Oracle Cloud Infrastructure (OCI), Containerization & Orchestration, Infrastructure Automation, Linux Administration, Infrastructure as Code (IaC) Concepts, YAML Configuration.

Software Testing & Quality Assurance: Manual Testing, Test Automation, API Testing, Test Case Design, Bug Reporting, Debugging.

Databases & Data Analytics: Relational Databases, Database Development, Oracle APEX, Microsoft Excel, Power BI.

Game Development: Unity (2D & 3D), VR & AR Development, Gameplay Programming, Cross-Platform Development, UI Development, Performance Optimization.

VOLUNTEERING

Admission Helper – STA Newcomers at El Sewedy Technical Academy - STA, 10th of Ramadan City, Egypt June 2024 - July 2024

- Assisted in the registration and orientation of 50+ new students and families, ensuring a smooth onboarding experience.
- Coordinated with staff to streamline the admission process, reducing wait times and improving efficiency.
- Provided guidance and support to newcomers, enhancing their integration and overall experience at the institution.

Ramadan Box Preparation Helper at Egyptian Food Bank, New Cairo, Egypt March 2023

- Helped prepare and organize 200+ Ramadan food boxes for families in need, contributing to community welfare.
- Collaborated with a volunteer team to ensure timely and accurate distribution of resources.
- Supported logistics and packaging processes, improving workflow and efficiency during high-demand periods.

PROJECTS

Learning Management Platform

Developed a full-stack learning management platform using React, Laravel, PostgreSQL, and PHP, implementing secure authentication, course management, RESTful APIs, and transactional email notifications through the Resend API.

Self-Hosted Infrastructure Platform

Designed, deployed, and maintained a self-hosted Linux infrastructure featuring containerized services, reverse proxies, DNS services, centralized authentication, SSL/TLS, VPN, NAS, automation, and enterprise networking practices.

Windows Server Infrastructure Deployment

Deployed and administered a Windows Server environment on Oracle Cloud, configuring Active Directory, identity and access management, remote administration, and core Windows Server services.

Enterprise Web Application Testing

Performed manual and automated testing using Selenium, Postman, and Jira, creating test cases, validating APIs, and identifying, documenting, and tracking software defects within Agile development workflows.

Student Attendance Management System

Developed a database-driven student attendance management system using Oracle APEX and SQL, implementing attendance tracking, reporting, and role-based workflows.

Smart Power Management System

Developed an IoT-based power management solution integrating sensors, automation logic, and real-time monitoring for intelligent device control.

EcoRun Cross-Platform Game

Developed a cross-platform endless runner in Unity, implementing gameplay mechanics, collision detection, object pooling, and performance optimization.

Industrial Quality Inspection Simulator

Developed a VR/Desktop quality inspection simulator in Unity, implementing interactive inspection mechanics and defect detection to simulate industrial manufacturing workflows.

Renault Augmented Reality Experience

Built an augmented reality application enabling users to visualize and interact with a 3D vehicle through QR-code tracking, real-time object manipulation, and material customization.

CERTIFICATES

CCNA+ from Cisco Networking Academy November 2023

Comprehensive training in enterprise networking, routing and switching, IPv4/IPv6 addressing, subnetting, network configuration, troubleshooting, and infrastructure management.

Azure Fundamentals (AZ-900) from Microsoft May 2024

Demonstrated foundational knowledge of Microsoft Azure, cloud computing concepts, core Azure services, pricing models, governance, security, and cloud architecture.

Linux Essentials from NDG **November 2024**

Acquired practical Linux administration skills including command-line operations, file systems, user and permission management, shell scripting, networking, and system services.

Prompting Essentials from Google **December 2024**

Learned practical prompt engineering techniques for generative AI, effective AI-assisted workflows, content generation, reasoning strategies, and productivity optimization.

Cybersecurity Professional Certificate from Google **February 2025**

Developed practical cybersecurity skills including security operations, Linux administration, Python, SQL, SIEM tools, incident response, risk management, and threat analysis.

Ethical Hacker from Cisco Networking Academy **April 2025**

Gained hands-on experience in penetration testing methodologies, reconnaissance, vulnerability assessment, web security, privilege escalation, and ethical hacking techniques.

Security, Compliance & Identity Fundamentals (SC-900) from Microsoft **August 2025**

Learned Microsoft security principles including Zero Trust, identity and access management, Microsoft Entra ID, compliance, governance, and cloud security solutions.

Digitopia Hackathon (Round 2) from NTRA & Ministry of Communications & Information Technology **September 2025**

Advanced to Round 2 of a national innovation hackathon, collaborating on technology-driven solutions addressing real-world challenges through software engineering and digital innovation.

Azure AI Fundamentals (AI-900) from Microsoft **December 2025**

Learned core artificial intelligence and machine learning concepts, Azure AI services, natural language processing, computer vision, conversational AI, and responsible AI principles.
